Skills

- Angular
- React
- NextJS
- HTML5
- JavaScript
- TypeScript
- SCSS
- Bootstrap
- Material
- Tailwind
- NgRx
- Redux
- Jest
- Node
- Java
- Spring Boot
- MongoDB
- MySQL

Soft Skills

- Leadership
- Teamwork
- Problem Solving
- Documentation
- Communication
- Collaboration
- Time Management
- Estimation
- Adaptability
- Decision Making
- Conflict Resolution
- Empathy
- Work Ethic
- Patience
- Attention to Detail

Education

B.Tech. (CSE) Lovely Professional University in 2015 with **8.4 CGPA (75 %)**

HSC from MBSS school, Bikaner in 2010 with **84%**

SSC from RSV school, Bikaner in 2008 with **91%**

Professional Summary

Software Engineer with ~10 years of experience leading teams, managing complex projects, and designing solutions across frontend, backend, data pipelines, CI/CD, reporting, alerting, monitoring, integrations, and payments.

- Led frontend development teams, delivering performant web applications using JavaScript, TypeScript, HTML5, CSS, RxJS, NgRx, Redux, and UI frameworks (Bootstrap, Materialize, Tailwind CSS, etc.) while employing Test-Driven Development (TDD) with Jest .
- Solved complex video streaming challenges (HLS, MPEG-DASH, DRM...) using WebRTC, Twilio, Opentok, and players such as VIDEOjs and SHAKA, improving user experience significantly.
- Proficient in build tools (Gulp, Grunt, Webpack, Docker, Kubernetes), CI/CD (Jenkins), web servers (Nginx), and code analysis(Sonarqube) for enhanced code quality.
- Experienced in CDN management, content delivery optimization, and infrastructure planning, ensuring scalability and resilience.
- Extensive experience in creating, publishing, and managing custom packages, reusable component library (npm, deb), facilitating development efficiency and component reusability.
- Developed, maintained, and published decentralized, white labeled, Progressive Web Apps, including offline functionality and isolated network compatibility.
- Leveraged AWS services (S3, Lambda, DynamoDB, CloudFront, Elastic Beanstalk), to design scalable and robust web applications.
- Experience with backend technologies (C#, Node.js, Java, Django) and databases (MongoDB, MySQL, Microsoft SQL)
- Utilized project management tools (JIRA, Confluence, Trello) for effective coordination and streamlined workflows.
- Strong understanding of accessibility, performance optimization, web analytics, and SEO techniques for user-centric development.
- Expertise in location-based solutions, including mapping, autocomplete, and rendering using OpenStreetMap and Leaflet.
- Proactive in staying updated with industry trends, continuously improving development practices.

Work Experience

Wissen Technology

- Principal Engineer : May-24 - Mar-25
- Senior Principal Engineer : Apr-25 - Present

- Deputed to a leading global financial services firm, contributing to mission-critical settlements and post-trade processing systems.
- Designed and developed Java-based backend microservices deployed on Azure, focusing on scalable, secure, and performant architecture.
- Built and enhanced frontend platforms using Angular and modern UI technologies to improve operational efficiency.
- Collaborated with distributed global teams across multiple time zones to integrate systems used for operations, reporting, and data transformation.
- Actively involved in full SDLC: design, development, testing, code reviews, CI/CD deployments, monitoring, and production support.
- Mentored and guided team members on both frontend and backend best practices, promoting code quality and knowledge sharing across the organization.
- Led internal technical discussions, conducted peer reviews, and contributed to hiring and onboarding activities, strengthening team capabilities.

SugarBox

- Engineering Manager : Oct-23 - Mar-24
- Lead Engineer : Apr-22 - Sep-23
- Sr Software Engineer : Dec-20 - Mar-22

- Managing development of SugarBox's White labelled, Decentralized Progressive Web App (sugarboxapp.com including an in-flight entertainment(IFE) solution across diverse airline partners airflix.co.in)
- Overseeing Reporting & Analytics Integration like WebEngage, In-house data stream, Gtm, Facebook pixel, etc. Implementing Robust error handling and reporting across different product suites within SugarBox. Leading Drm Playback Implementation using Widevine and Fairplay, Managing Payments Integrations, Real time flight data tracking using FlightAware, Partner Integrations using shopify and woocommerce, Payment Integrations (Razorpay, Simpl, Amazonpay etc), Themes, etc.
- Instrumental in setting up pipelines for distribution and deployment of services to decentralized edge nodes leveraging DPKG, deb packages, nginx virtual hosts, dnsmasq etc.

Talocity - Sr. Frontend Developer : Nov-19 - Dec-20

- Developed touchless hiring solutions at talocity using video interviews and assessments.
- Developed User interfaces from the design using the latest Angular Framework best practices
- Worked on building multimedia applications using webRTC, Twilio, Opentok, jwplayer, canvas, video, audio etc
- Collaborated with cross-functional teams to ensure seamless integration of the product.
- Implemented cognitive personality reports to enhance the hiring process.
- Was also involved in Development and Coding, Technical Strategy, Project Planning and Execution, Architecture and Design, Code Reviews and Quality Assurance, Collaboration and Communication, Performance Optimization, Team Development, Documentation, Troubleshooting and Bug Fixing, and Continuous Improvement

ALTBalaji - Sr. Web Developer : Sep-18 - Nov-19

- Contributed to the development of a subscription-based video-on-demand (SVOD) service.
- Ensured compatibility across multiple interfaces, including desktops, laptops, tablets, and smartphones.
- Implemented responsive designs and optimized the user experience.
- Worked on complete migration of existing angularjs application to Angular

CheckApp - Web Developer : Jun-17 - Sep-18

- Developed a cloud-based, cross-platform Healthcare ICT (Information, Communication & Technology) application.
- Implemented various features and functionalities based on client requirements.
- Worked on UI/UX improvements for enhanced user experience.
- Setup the automated deployment pipeline using Jenkins
- Worked on integrating the application with various third-party services

Mahindra Logistics - Sr. Executive IT : Sep-16 - Jun-17

- Contributed to the development of logistics solutions as a third-party logistics (3PL) provider.
- Implemented end to end solution in frontend(angularjs) and backend(.net)
- Worked on optimizing performance and user experience.

Cognizant - Programmer Analyst : Jun-15 - Sep-16

- Started career as a campus hire from University.
- Worked on frontend development projects for clients in asp.net
- Worked on creating reuseable components in angularjs
- Collaborated with team members to deliver high-quality solutions.
